**(5) Read the passage given below and answer the questions that follow: 5 x 1 = 5**

An old priest told me this story when I was very young. I have since wondered many times where it came from. No one has been able to tell me. Centuries ago a great artist was engaged to paint a mural for the Cathedral in a Sicilian town. The subject was the life of Jesus. For many years the artist laboured diligently, and finally the painting was finished except for the two most important figures; the Child Jesus and Judas Iscariot. He searched far and wide for models for those two figures. One day while walking in an old part of the city he came upon some children playing in the street. Among them was a twelve year old boy whose face stirred the painter's heart. It was the face of an angel-a very dirty one, perhaps, but the face he needed. The artist took the child home with him, and day after day the boy sat patiently until the face of the Child Jesus was finished. But the painter still found no one to serve as model for the portrait of Judas. For years, haunted by the fear that his masterpiece would remain unfinished, he continued his search.

- (i) What was the artist engaged to paint?
- (ii) For which two figures did the artist require models ?
- (iii) Where did the artist find his model for the child Jesus?
- (iv) Why did the artist take the child home?

Languages are of different kinds-spoken language, written language, sign language, code language, body language, Braille or language of the blind, and the more recent ones being the machine language and the computer language. Many languages have a long history. The Greeks, the Romans, the Egyptians, the Chinese and the Indians are among those, whose languages are centuries old. The number of languages used in verbal communication is extremely large. It is said that there are as many as 3500 identified languages throughout the world. Although this is true of the spoken language, the number of written languages is much lower, with one estimate placing it at not more than 500. Within a language there are sub-languages that are called dialects. A dialect is a form of speech peculiar to a district, class or persons. It is a subordinate variety of a language with distinguishable vocabulary, pronunciation or idioms.

My brother saddled up on his beast of an invention; put his bike helmet on along with his leather gloves. He threw his leg over the contraption and held his thumb up for contact just like in those old war movies where the guy on the ground spins the propeller of the plane. I gave him the thumbs up also and he pushed off to get the bike up to speed before throwing the switch. ‘We have lifted off’, I yelled! My brother put his hand down and threw the switch. The beast came to life and the bike hurried off into the distance. I tried to keep up with him, but the bike was much too fast. Standing there out of breath with my hands on my knees, I could see my brother was having a little trouble turning the bike around. He turned it sharply around the corner and disappeared around the block. When he reappeared minutes later he was headed straight for me at a high rate of speed. Tired as I was I had to run for my life to keep ahead of the invention. Darting through the double gate of the back yard I managed to escape under the clothes line to the back fence.

**8) Make notes of the following passage and Prepare a summary using the notes. 5 + 5 = 10**

If you have a diabetic patient at home, there are chances that they might suffer from hypertension (high blood pressure), heart disease, vascular disease (small blood vessel disease), or kidney disease as well. The physician will treat these problems along with the diabetes. It is important to treat such complications as early as possible because a combination of high blood pressure, diabetes, and kidney disease is a triple threat to your health. Many people, however, do not have any complications and can take actions recommended by their physicians concerning diet, exercise, medication in the form of pills instead of insulin injection, and good mental health. If you have non-insulin-dependent diabetes, it is possible that your diabetes may reverse itself and that your blood sugar levels return to normal and stay that way, particularly if you maintain good diet and exercise habits. Good diet, ideal weight, adequate exercise, adequate insulin availability and a stable mental attitude are the keys to treatment for diabetes.

The best little scrub by the side of the hill;  
Be a bush if you can't be a tree.  
If you can't be a bush be a bit of the grass,  
And some highway you will happier make;  
If you can't be a lotus then just be a bass-  
But the liveliest bass in the lake!*

The poet tells the readers not to \_\_\_\_\_ because of their positions in life. Though one can't be a banyan tree on top of the hill, one can still be the best \_\_\_\_\_. One can at least be a \_\_\_\_\_ if not a tree. If one can't be a \_\_\_\_\_ one can be a grass or a lotus. If one can't even be a lotus, then one can just be a bass, and be the \_\_\_\_\_ bass in the lake.

The story of the unfinished masterpiece spread afar, and many men fancying themselves of wicked countenance, offered to pose as models for the face of Judas, but in vain. The old painter looked for a face that would serve to show Judas as he had envisioned him; a man warped by life, enfeebled by surrender to greed and lust. Then one afternoon, as he sat in the tavern over his daily glass of wine, a gaunt and tattered figure staggered across the threshold and fell upon the floor. 'Wine, wine,' he begged. The painter lifted him up, and looked into a face that startled him. It seemed to bear the marks of every sin of mankind. Greatly excited, the old painter helped the profligate to his feet.

Our blood consists of three types of blood cells: red blood cells, white blood cells and Platelets. The red blood cells are small, thin and disc shaped. They are composed of an iron containing component called haemoglobin. When blood passes through the lungs each haemoglobin molecule picks up four oxygen molecules and supplies them to the body's tissues. Red blood cells also transport the carbon dioxide from the tissues to the lungs. The lungs throw out this gas when we exhale. The white blood cells are big and few compared to red cells, numbering only one for every 700 red cells. They are the body's defenders, the soldiers that fight bacteria and other enemies. One kind, for instance, destroys dead cells. Other kinds produce antibodies against viruses. Some others consume and digest bacteria.

I can remember like yesterday the day my father came home from the war. A flying officer during World War II, he was dressed in a blue uniform with a skinny, boat shaped cap plonked so precariously on the side of his head that I wondered why it never fell off. A neighbour called out, "What's the weather like up there?" as my giant-like father bounded by, carrying a battered brown suit case, strapped together with a large leather belt. He was, without question, the tallest man I had ever seen. As he walked up the front path of our home, he saw Mum and me standing on the veranda and he dropped the suitcase. The belt came undone and the contents spilled out onto the lawn.

- Is the speaker describing his experience of the present or the past? What makes you say so?

**8) Make notes of the following passage and Prepare a summary using the notes.** 5 + 5 = 10

The necessity to preserve, transmit and propagate the rich cultural legacy left behind by the builders of music in the country in general and in Tamil Nadu in particular was felt in the years 1949. It was felt necessary that the inherited musical urge in our youngsters and the past tradition of our musical culture with its ancient purity could be well preserved only when opportunities have been provided to those who have an aptitude for learning music. The Central and State Government with their financial aids established the Central College of Karnatic Music in August 1949. The college at first was at Rahmed Bagh' near Santhome and it was there for two years. Since the building could not accommodate all the sections, it was subsequently shifted to "Bridge House" at Adyar. Again owing to inadequate accommodation, the college was shifted from the "Bridge House" Adyar to 'Brodie Castle' on Greenways Road. The college is functioning in the same building now, which has since been named as "Thendral" and has a strength of more than 600 students. In the beginning, there were only Vocal, Violin and Veena sections besides general Musicology. Candidates with a considerable standard in music alone, were admitted into the two Sangeetha Vidwan Title course and after completion they were permitted to appear for the 'Sangeetha Vidwan' Title examination conducted by the Director of Government Examinations, Madras.
